VOL. IV. DECEMBER, 1914. NO. 12.

Edited by EDWARD JACKSON. Assisted by WILLIAM H. CRISP.

INDEXES.

As usual, the present number is largely given over to the annual indexes. Knowing an author's name one may find, in the **Index of Authors**, references to all papers that he has published during the year. Where references to a definite subject are sought the **Index of Subjects** is to be used very much as an ordinary book index.

In every index, however, there is a personal equation, and if it is desirable to cover the ground very thoroughly it may be best to go over each number of the year and examine the particular heading under which that subject might be mentioned. For example, in looking up traumatic cataract, one might examine all the lists of papers on the "Lens," and also the papers upon "Injuries."

The **repeated titles** will often be found to render accessible the essential part of a paper that would otherwise be entirely out of reach.

MISSING NUMBERS.

Subscribers are requested to look over their files **at once**, and if any numbers are needed to complete the same, to apply for these immediately. Complete sets of OPHTHALMIC LITERATURE are now obtainable only with difficulty, and will become more valuable from year to year.

Ophthalmic Year Book

VOLUME X.

READY FOR DELIVERY—This volume contains 460 pages, embracing a digest of the ophthalmic literature of the world, for the year 1913, with a bibliography of all important papers therein mentioned. Illustrated.

The following opinions of the Ophthalmic Year Book have been expressed by leading ophthalmic journals:

"Its completeness, the judicious selection and the perspicuous arrangement of the subjects are admirable. . . . Its price is nothing compared to its value to the student."— American Journal of Ophthalmology, Dec., 1911.

"It has the unqualified endorsement of all ophthalmologists who are properly familiar with it; and deserves immediate introduction to the shelves of all ophthalmologists who are yet to learn its value."— Annals of Ophthalmology, Jan., 1912.

"It would seem that the merits of this Year Book must be sufficiently apparent to every active oculist to lead him to subscribe."— Archives of Ophthalmology, March, 1912.

"We have frequently before had to express our admiration of the wonderful completeness of this record of the year's work in ophthalmic science, and to marvel at the energy and work that must have gone to its completion."— Ophthalmic Review, Feb., 1912.

"For comprehensiveness the Ophthalmic Year Book has no equal in our language. It well nigh passes comprehension how any ophthalmic surgeon can afford to be without it."— The Ophthalmoscope, April, 1912.

The Ophthalmic Year Book will be sent postpaid on receipt of price, Five Dollars.
